# How to Create a Program and Execute It

1. Open Visual Studio.
2. Click File
3. Click New Project

4. Click Visual C++
5. Click Win32
6. Click OK

7. Add the two highlighted lines.
8. Press the green triangle to execute the program.

```cpp
1 // ProjectNameGoesHere.cpp : Defines the entry point for the c
2 //
3
4 #include "stdafx.h"
5 #include <iostream>
6
7 int _tmain(int argc, _TCHAR* argv[])
8 {
9     std::cout << "Hello World" << std::endl;
10    return 0;
11 }
12
13
```
